Franchise Fees

- Hotel Franchise Fees are the compensation paid to the franchisor for the use of the chain's name, logo, identity, image, goodwill, operating systems and procedures, marketing plans, and referral and reservation systems
- The median franchise fee as a % of rooms revenue in 2014 for all types of hotels was 11.8% (HVS)
 - Extended stay hotels from 13.3% to 9.5%, e. g. Element, Residence Inn, Mainstay Suites
 - Limited service hotels from 14.7% to 5.7%, e.g. Hampton Inn, Quality Inn/Suites, Best Western
 - Select service hotels from 14.5% to 3.3%, e.g. Hilton Garden Inn, Ramada Inn, Lexington Hotel
 - Full service hotels from 14.2% to 7.7% e. g. Marriott, Hilton, Sheraton, Ascend
- Franchise Fees are normally formulated utilizing an initial fee paid upon applying for the franchise plus continuing fees paid periodically during the term of the franchise.

Basic Components of Franchise Fee

Initial Fee

- Minimum Dollar Amount + Additional Amount
 Based on Hotel's Room Count
- Example:
 - The initial fee may be a minimum fee of \$45,000 plus \$300 per room for each room over 150
 - so a hotel with 125 rooms would pay \$_____
 - one with 200 rooms would pay \$_____

Continuing Fees

- Continuing fees are assessed based on several different formulas.
 - Royalty fees are generally based on a percentage of rooms revenue (between 0.9 – 7.9% in 2014).
 - Advertising & marketing fees are generally calculated on a percentage of rooms revenue (between 0.4% to 4.3% in 2014).
 - Reservation fees may also be based on either a percentage of rooms revenue (0.1% to 3.6% in 2014) or a dollar amount per available room per month (\$0.14 to \$8.65).
 - Frequent traveler fee are typically based on a percentage of total or rooms only revenue (0.0% to 2.6% in 2014) generated by a program member staying at a hotel, or a fixed dollar amount (\$2.30 to \$6.35) for each room occupied by a program member.

Franchise Fee Example

Hilton Garden Inns - 2014

A. Initial Franchise Fee

\$75,000 for the first 150 guestrooms plus \$450 per room in excess of 150 rooms (2% of rooms revenue and average \$560 per room for 2014)

B. Continuing Franchise Fee (% of rooms revenue)
Royalty Fee : 5.5%
Reservation Fee: 0.3%
Advertising & Marketing Fee: 4.3%
Frequent traveler fee: 2.5%
Misc. fee: 1.6%

C. Total Cost

The estimated total cost for a Hilton Garden Inn Franchise in 2014 was 14.5% of rooms revenue; over a 10-year period of time is 12.91% of rooms revenue or about \$43,527 per room

Franchise Fee Review Questions

- 1. What revenue figure is franchise fees based on?
- 2. What is the difference between the initial franchise fee and royalty fee?
- 3. Will franchise fees increase or decrease when rooms revenue increases?
- 4. Franchise fees are roughly what percentage of rooms revenue for the hotel industry in 2012?
- 5. Franchise fees are allocated to which undistributed operating expense category?

Hotel Franchise Fee Calculation

• What is the total franchise fee 1) on a per available room basis and 2) as a percentage of rooms revenue for a 300-room hotel that recorded an occupancy percentage of 75% with a \$95.00 average room rate? The franchise fee for the hotel was based on the following fee structure. The initial fee is based on a minimum fee of \$25,000 plus \$150 per room in excess of 100 rooms. The hotel is required to pay a 3% of rooms revenue royalty fee, a 2% of rooms revenue reservation fee, a marketing fee of \$0.50 per available room per day, and a \$3.00 per occupied room frequent traveler fee (frequent travelers represent 15% of total rooms occupied).

Undistributed Operating Expenses Review Questions

- Undistributed operating expenses represent approximately what percent of total revenue in full-service hotels?
- 2. What is the largest undistributed expense category based on its percentage of total revenue?
- 3. Which undistributed operating expense category has increased the most in recent years as a percentage of total revenue?
- 4. Which undistributed operating expense category has the highest amount of fixed expenses to total expenses?

Gross Operating Profit (GOP)

Revenue (100%)

- Direct Operating Expenses or departmental expenses (40%)

Gross Profit or departmental income (60%)

- Undistributed Operating Expenses (25%)

Gross Operating Profit (35%) or operating income or income before fixed charges or house profit

Management Fees

Base Fees

+ Incentive Fees

= Total Management Fees

Management Fee Structure

1. Base Fee

 determined solely by percentage of total revenue, creating an incentive for the operator to increase marketing efforts and other activities that increase sales volume

2. Incentive Fee

 based on a specified percentage of a defined net income, usually determined by sales volume and expense control. Therefore, incentive fee rewards the operator for efficient, profitable management

3. Combination Fee

 For example, a hotel company may charge 4% of gross revenue and 25% of the adjusted income

Management Fee Problem

An 220-room independent hotel recorded an occupancy percentage of 66.2% and an average room rate of \$133.75. The hotel's rooms revenue ratio to total revenue was 56.5%, and GOP was 32.4%. What is the management fee for the hotel based on a structure that required the owner to pay the managing company 1.6% of gross revenue and 8% of GOP? Compute the management fee both 1) as a percentage of total revenue and 2) on a per available room basis.
